

WHITE LINE
BELGIAN DESIGN!
CREATION OF ANTWERP BORN PVD

The market of light and lighting is very often plagued with imitation. Pvd is therefore very proud to be able to present an original and own creation : White Line !

White line is an ingenious collection of mounted fixtures which look like recessed ones. This surprising creation is the result of a year long search for timeless and discrete mounted lights and the realisation that there is still a gap in the market.

The uniqueness of White Line is that it is indeed a mounted fixture but it disappears partly in the ceiling or the wall.

The use of rough powdercoating RAL 9003 and a seamless cover make it possible to paint over the White Line fixture which allows for a perfect finish matching the wall or ceiling .

This collection also incorporates the latest light sources available at this moment : the Philips CDM-R111, the Sylvania Britespot ES50, the Microlynx 6W REB led lighting and of course the actual halogen, compact fluo and TL 5 lamps. More so, the ceiling lights are attached to a mobile arm in the fixture whereby they can be extended and are able to direct the light horizontally.

Truly unique !

What about black marks on the wall or ceiling because of the heat of the lamps ? Not with White Line ! The frame that holds the lamps absorbs all the heat. Because of a handy click- system this can completely be disassembled and can easily be cleaned with Chemico and water.

You don't like complete darkness when the lights go out ? No problem. When using compact fluo or TL5 lamps there is the possibility to fit a fluorescent cover. This cover contains a white paint which charges up because of the light. This is why it still glows like a blue sky even after the lights have gone out. Just imagine : White Line brings you a little oasis of peace each day !

Pvd also created original white packaging for the fixtures and fittings and included a little thank you note in Dutch, French and English : 'Thank you for choosing White line '.

All packaging includes the necessary instructions, a technical description and CE approval for each unit.

We hope that White Line will enchant you too.

Why not have a look at www.pvdconcept.be !

Thank you for your attention,
Yours sincerely
